

The giraffe is an animal which lives in great numbers on the African continent. It has a long neck which it uses to eat the leaves growing at the tops of tall trees. Many giraffes grow to heights of more than 5 meters, and their bodies are covered in a yellowish colored coat dappled with brown.

This paper craft is extremely easy to make and doesn't even require glue - just cut and fold!
Choose one of the backgrounds too for an attractive set!

- Cut in line
- - - - - Valley fold
- Mountain fold

*We recommend printing on high quality printer paper.

Assembly Instructions

After cutting out the piece, fold it along the fold lines. Finally, hook the slots on the stopper together, so that the heart marks are visible.
