

The giraffe is an animal which lives in great numbers on the African continent. It has a long neck which it uses to eat the leaves growing at the tops of tall trees. Many giraffes grow to heights of more than 5 meters, and their bodies are covered in a yellowish colored coat dappled with brown.

This paper craft is extremely easy to make and doesn't even require glue - just cut and fold!

Choose one of the backgrounds too for an attractive set!

- Cut in line
- - - - - Valley fold
- - - - - Mountain fold

\*We recommend printing on high quality printer paper.

### Assembly Instructions

After cutting out the piece, fold it along the fold lines. Finally, hook the slots on the stopper together, so that the heart marks are visible.
